

# Revising division facts

Consolidate recall of the division facts for the 2, 3, 4, 5, 8 and 10 multiplication tables, and related facts involving multiples of 10

challenge 1

Write a division fact for each number coming out of the machine.

<p>a</p> <p>36 12 27 24 9</p> 	<p>b</p> <p>24 56 48 32 16</p> 	<p>c</p> <p>12 36 20 44 32</p> 
---	--	--

challenge 2

Look at the number sentences on either side of the boxes. Use these symbols <, = or > to make the number sentences true.

a	$45 \div 5$	$36 \div 3$	b	$64 \div 8$	$32 \div 4$	c	$48 \div 8$	$36 \div 4$
d	$56 \div 8$	$48 \div 4$	e	$18 \div 3$	$28 \div 4$	f	$50 \div 10$	$80 \div 8$

challenge 3

1 Find the missing digit, or digits, in each calculation.

a	$36 \div 9 = \text{circle}$	b	$48 \div \text{triangle} = 12$	c	$\text{square} \div 4 = 9$
d	$21 \div 3 = \text{square}$	e	$\text{circle} \div 8 = 8$	f	$6 \div \text{circle} = 2$
g	$2 \times \text{circle} = 5$	h	$6 \times \text{triangle} = 12$	i	$3 \times \text{square} = \text{circle}$

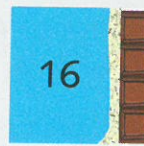

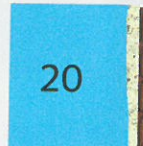

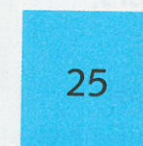

2 a	$360 \div 4 = \text{circle}$	b	$280 \div 4 = \text{square}$	c	$\text{circle} \div 3 = 90$
d	$210 \div 3 = \text{square}$	e	$320 \div 8 = \text{triangle}$	f	$160 \div \text{square} = 40$
g	$240 \div \text{triangle} = 30$	h	$640 \div \text{circle} = 80$	i	$350 \div \text{triangle} = 70$

# Solving problems

Solve problems and reason mathematically

Challenge 1

Write a multiplication and division fact for each of these pictures.

a		b		c		d	
---	---	---	---	---	---	---	---

Example

$24 \div 3 = 8$   
 $8 \times 3 = 24$

Challenge 2

Read the clues to find the numbers.

a It is twelve times larger than 4.	b It is double 8 and 4 more.	c It is 20 times larger than 3 multiplied by 2.
d It is double 8 and double 8 again.	e It is 5 less than 25 divided by 5.	f It is 5 times more than 9.
g It is half of 64 and half again.	h It is the sum of 40 divided by 8 and 24 divided by 4.	i It is the same as 9 multiplied by 4 and 3 multiplied by 12.

Challenge 3

- Nabil has 64 stamps. Amal has 8 stamps. How many times more stamps does Nabil have than Amal?
- 56 cars are in the car park in the morning. Half are gone by lunchtime. How many are left?
- A pizza is split into slices and eaten. Johan eats 8 slices of pizza and May eats 12 slices of pizza. How many slices in the whole pizza?
- The cook has 40 biscuits. He needs 8 times more for the packed lunches. How many biscuits does he need in total?
- 27 cakes are shared between 9 children. How many for each child? If cakes cost 40p each, how much did each child pay?
