flipped over

Tornado Intercept Vehicles **Answers**

To explain what causes tornadoes and the effects they have.

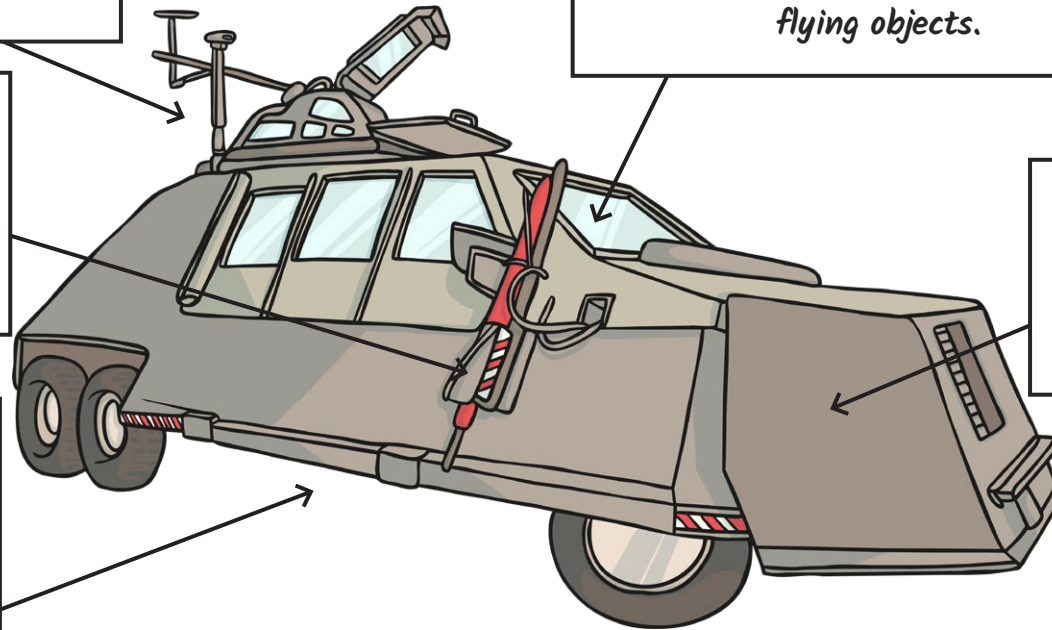

Monitoring equipment for collecting data while drivers are safely inside the TIV.

Tough plastic to prevent the windscreen being broken from flying objects.

Gas-powered spike for securing the TIV to the ground to stop it from being flipped over.

Strong armoured plating to protect the drivers from flying objects and to add extra weight to prevent it from flipping over.

Low body to protect the TIV from being flipped over.

gas-powered

strong armoured plating

tough plastic

low body

monitoring equipment

flying objects

collecting data

flipped over
